ABOUT:

Viral diseases create havoc if not controlled at appropriate times. In this direction, deeper investigations and proper understanding are required. Many laboratories are involved in investigations related to virus diseases. Understanding and the exchange of outcomes in such studies are required to design potential control measures. In this direction, this conference is aimed at bringing eminent scientists in the field of virology across the globe and sharing their findings with young minds. We hope that this kind of interaction would ignite the interest in the young researchers and make them contribute immensely to the field of virology.

TARGET PARTICIPANTS:

Eminent scientists in the field, young researchers, undergraduate and postgraduate students, industrialists, start-up scientists in the field and entrepreneurs.
